EXPERIENCE

LeanCode, Warsaw/remote — Software Developer

JULY 2021 - PRESENT

- lead developer of Patrol – a powerful open-source testing framework for Flutter. Responsible for conducting technical research, development & testing, writing documentation, integrating with CI services, and supporting internal & external users
- maintainer of internal tooling (packages, docs, templates, scripts)
- developer of mobile apps for clients in a team working in the Scrum methodology. Explored topics such as state management, integration with native platforms, and deploying to app stores

ACHIEVEMENTS

Google Code-in 2019 — Grand Prize Winner

DECEMBER 2019 - JANUARY 2020

- Contributed to open-source for 2 months. Completed 50 coding, documentation, research, and design tasks, and lots of additional work
- Worked with mentors and other contestants to develop an open-source mentorship system for women starting careers in tech
- Awarded an all-expenses-paid trip to Google HQ in Mountain View, California for a week-long winners event

OPEN SOURCE

- Flutter - contributed a few dozen issues and PRs
- Maintainer of flutter_downloader and location packages

TALKS

- Reimagining Flutter UI tests with Patrol
